

Ascension

CASE STUDY

Ascension x Madison Ave Consulting

Deal flow visibility for financial sponsors

Ascension was formed to accelerate the pace of progress and achieve a higher standard of real estate advisory. Their purpose: elevate corporate real estate efficiency, strategy, access, and insight for financial sponsors and business owners, globally.

THE CHALLENGE

Advisory velocity needs advisory-grade tooling

Ascension's team advises sophisticated financial sponsors across a global deal pipeline. Their existing Salesforce environment needed to match that velocity.

No End-to-End Visibility

Opportunity deal flow was hard to see across the full pipeline.

Fragmented Documents

Document management across client engagements was scattered and inconsistent.

Spreadsheet KPIs

Leadership reporting was built in spreadsheets, not live data.

No Single Sign-On

Secure, frictionless team access had not been implemented.

THE SOLUTION

Four targeted Salesforce initiatives

Madison Ave Consulting delivered a phased Salesforce build focused on the highest-impact levers for an advisory firm.

Deal Flow Improvement

End-to-end visibility across every active engagement.

Document Management

Structured storage tied directly to each deal.

Tableau KPI Buildout

Live dashboards for leadership across the full pipeline.

SSO Implementation

Secure, friction-free access for the entire team.

THE APPROACH

Agile delivery, six-week MVP

We structured the engagement around an agile, two-week sprint cadence with a six-week MVP target.

2wk

Sprint Cadence

Consistent delivery rhythm from kickoff to MVP.

6wk

MVP Target

Fast enough to matter for the next deal on the pipeline.

50hrs

Dev Per Week

30 to 50 development hours per week through MVP.

Lead Solution Architect

Senior architecture oversight on every sprint.

Technical Architect

Deep technical execution alongside functional delivery.

KISS Principle

The simplest solution that delivers the outcome. Every time.

WHY IT WORKED

Speed of visibility wins deals.

Advisory firms live or die on the speed of deal flow visibility. Ascension needed a partner that understood the specialized workflows of CRE advisory and could ship an MVP fast enough to matter for the next deal on the pipeline. That is exactly what we built.

Salesforce excellence for commercial real estate advisory

Madison Ave Consulting partners with advisory firms to build the operational infrastructure that matches their deal velocity.
