

CASE STUDY

Edison Home Health Care Intake that moves at the speed of need

Edison is a national home health provider. Their patient intake team was drowning in paperwork and manual processes. Every delayed intake was a patient waiting for care.

EDISON
HOME HEALTH CARE

THE CHALLENGE

Intake bottlenecks cost care hours

Manual Form Generation

Doctor, insurance, and state-required forms all created by hand. Every form was a delay.

Zero Visibility

Management had no real-time view into intake status. Decisions were made in the dark.

Capped Capacity

Case managers were limited to roughly 25 cases each. Growth was impossible.

Stalled Admissions

Monthly patient admissions were stuck at 150. The ceiling was a process problem.

THE SOLUTION

Salesforce Service Cloud + Tableau CRM

Madison Ave Consulting automated the manual work and gave management live dashboards.

Automated Forms

Doctor, insurance, and state-required forms generated automatically. No manual effort.

Real-Time Analytics

Live dashboards tracking intake velocity. Management finally had the full picture.

Reports and Dashboards

Out-of-the-box Salesforce reporting paired with Tableau CRM for deep insight.

Streamlined Workflows

Case managers freed from busywork. More time for patients. More capacity for growth.

THE RESULTS

Numbers that changed the business

Twelve months after implementation, Edison's intake operation looked nothing like it did before.

3.7x

Patient Intake Growth

New patients entering the intake process in just 12 months.

80

Cases Per Manager

Triple the previous capacity. Same team. Better tools.

2x

Monthly Admissions

From 150 to 300 patients admitted per month.

Intake Directors finally had the data they needed to lead. Real visibility. Real decisions. Real outcomes.

CLIENT TESTIMONIAL

What the client said

"I cannot imagine running my Intake team without Salesforce. The tools, automation, reports, and dashboards are amazing. There is no better tool."
