

Help At Home x Madison Ave Consulting

Ten states, one caregiver experience platform

Help At Home is a national in-home personal care provider. Their Salesforce transformation had to scale across ten state markets while holding a consistent caregiver experience and meeting strict state EVV requirements.

1

Ohio

THE CHALLENGE

Scale the caregiver experience without sacrificing compliance

Fragmented Compliance

Ten markets. Each with its own state EVV requirements. No unified framework to manage them.

Mobile Experience Gap

Caregivers needed a mobile-first platform they would actually use. The old tools fell short.

Disconnected Operations

Intake, matching, scheduling, and care coordination were fragmented across separate tools.

Retention at Risk

Retention hinges on how the platform treats frontline staff. The stakes were high.

THE SOLUTION

Caregiver Experience on Salesforce Health Cloud

Madison Ave deployed a full Caregiver Experience platform across all ten markets.

360-Degree Caregiver View

EVV, incident reporting, vaccinations, schedule management, utilization, hiring, and training. All in one place.

Embedded EVV Mobile Tracking

Managed API integrations to Sandata and HCHB. Compliance built into the daily workflow.

Centralized Intake and Scheduling

Matching and scheduling unified on a single platform. No more tool-switching.

Automated RCM and Authorization

Recruiting and HR built on the same platform. One system. Full lifecycle coverage.

A team of specialists, one unified blueprint

We structured the engagement around four bespoke packages tailored to Help At Home's 2024 strategy. Each package scales hours and scope while keeping a consistent delivery framework.

1

Markets Lite

Focused scope. Fast activation. Core EVV and scheduling.

2

Markets

Full market deployment with dedicated delivery team.

3

Markets and Teams

Expanded scope with parallel rollouts and HR integration.

4

Markets Teams and Beyond

Maximum scale. Data migration. Continuous license optimization.

Dedicated Program Team

Project Manager, Engagement Manager, Consultant, and Developer assigned to the program. Parallel rollouts across multiple markets.

Built to Avoid Waste

Continuous license optimization kept spend lean. Managed data migration from legacy platforms ensured nothing was left behind.

WHY IT MATTERS

The ripple effect of a better caregiver experience

Elevated Job Satisfaction

Enhancing the caregiver experience is pivotal. A platform that respects frontline staff changes how they show up every day.

Stronger Retention

Elevated job satisfaction improves retention. Keeping great caregivers is the foundation of everything else.

Consistent, High-Quality Care

A stable workforce means consistent, high-quality patient care. That ripple effect is why we built the platform the way we did.
