

CASE STUDY

Community Home Care x Madison Ave Consulting

HHAx Integration for Broadway Home Care

Serving patients and caregivers across the tri-state area. One connected system. Built by Madison Ave Consulting.

THE CHALLENGE

Two systems. Duplicate data entry. Slow decisions.

The Problem

Community Home Care ran two powerful platforms. HHA eXchange owned clinical and payroll operations. Salesforce powered care coordination and growth. Neither talked to the other.

→ Manual Re-entry

Coordinators spent hours duplicating patient and caregiver data across both systems.

→ Stale Reporting

Census and utilization data was always a day behind. Decisions were made on yesterday's numbers.

→ Disconnected Truth

HHA eXchange held the source of truth. Salesforce never knew it.

THE SOLUTION

Bi-directional HHAX + Salesforce Integration

Madison Ave Consulting built a two-way, real-time integration between HHA eXchange and Salesforce for Community Home Care.

One-Click Profiles

Create new Patient Profiles, Caregiver Profiles, and Admissions directly from Salesforce.

Automatic Sync

Updated information pulls from HHA eXchange back into Salesforce automatically. No manual steps.

Real-Time Flow

Live data eliminates stale records. Every coordinator sees the same accurate picture.

On-Demand Reporting

Robust census and utilization reporting available the moment it is needed.

WHY IT MATTERS

Real-time clinical data drives real-time care decisions.

Accurate Data

Coordinators see the right patient and caregiver information the moment they need it.

Better Decisions

Confident, informed choices replace guesswork and delayed reporting.

Better Outcomes

Better care for the patients and caregivers at the heart of what Community Home Care does.

Madison Ave Consulting

Salesforce excellence for home care.

We build the integrations that let your team focus on what matters most. People.
