

CASE STUDY

Bluecrest Recovery × Madison Ave Consulting Health Cloud + ZenChart EMR

Bluecrest Recovery Center, part of Keystone Recovery, is a behavioral health provider focused on long-term recovery outcomes. Their clinical operations run on ZenChart. Their growth and coordination run on Salesforce. Both had to talk to each other.

THE CHALLENGE

Clinical Data Trapped Outside the CRM

Siloed Clinical Records

ZenChart held the clinical source of truth. Salesforce had no visibility into it.

Disconnected Operations

Salesforce managed intake, care coordination, and alumni engagement in isolation.

Blind Spot at the Point of Care

Coordinators needed clinical context to make real-time decisions. They did not have it.

Workflows Built for the Wrong Industry

Generic Salesforce did not capture the nuance of behavioral health workflows.

THE SOLUTION

Health Cloud Implementation + ZenChart Integration

Madison Ave Consulting delivered a full Salesforce Health Cloud implementation tied directly to ZenChart.

Health Cloud Patient Records

Unified patient records with full care team coordination built in.

Custom Behavioral Health Workflows

Intake and engagement flows designed specifically for behavioral health operations.

Bi-Directional ZenChart Integration

Real-time clinical data flowing between ZenChart and Salesforce. No manual entry.

Leadership Dashboards

Reports and dashboards giving leadership full visibility into clinical and operational performance.

WHY IT MATTERS

Clinical Context Enables Clinical Decisions

When care coordinators have real-time clinical data at their fingertips, they make faster, better decisions.

For patients in active recovery, that is the difference between staying on track and falling through the cracks.

Faster Decisions

Real-time data eliminates delays at critical care moments.

Better Outcomes

Coordinators act with confidence. Patients stay on track.

Madison Ave Consulting — Salesforce excellence for behavioral health.
