

CASE STUDY

WFUNA x Madison Ave Consulting

A UN-adjacent platform for global engagement

WFUNA, the World Federation of United Nations Associations, connects member UN associations across the world. Their mission demands a platform that can handle global engagement at scale.

The Challenge

GLOBAL NONPROFIT OPERATIONS ON SALESFORCE

Distributed Members

Member associations spread across dozens of countries with no unified view.

Program Complexity

Program management for major initiatives including WIMUN required structure at scale.

Fragmented Data

Contact and event data spread across tools and geographies with no single source of truth.

Reporting Gaps

Structured reporting across a global network was inconsistent and manual.

The Solution

SALESFORCE PROGRAM MANAGEMENT + USER SETUP

Madison Ave Consulting delivered a Salesforce environment that centralized WFUNA's global engagement.

Program Structure

Dedicated program management for WIMUN and other global initiatives.

Member Tracking

Association tracking across every geography in one unified platform.

Data Consolidation

Contact data unified from UN-adjacent events worldwide.

Access Model

User permissions built for a distributed global team.

Why It Matters

MISSION-DRIVEN WORK NEEDS MISSION-GRADE TOOLS

When a global nonprofit can see every member, every program, and every engagement in one place, the mission accelerates.

That is the outcome we build for.
