

CASE STUDY

Community Home Care x Madison Ave Consulting

HHAx Integration for Broadway Home Care

Community Home Care operates Broadway Home Care, serving patients and caregivers across the tri-state area. Their Salesforce and HHA eXchange environments needed to work as one connected system.

THE CHALLENGE

Two systems. Duplicate data entry. Slow decisions.

Siloed Source of Truth

HHA eXchange owned clinical and payroll operations. Salesforce powered care coordination and growth. Neither talked to the other.

Manual Re-Entry

Coordinators spent hours re-entering patient and caregiver data between systems. Every hour spent on data entry was an hour not spent on care.

Stale Reporting

Census and utilization reporting was always a day behind. Decisions were made on yesterday's data.

THE SOLUTION

Bi-directional HHAX + Salesforce Integration

Madison Ave Consulting built a two-way real-time integration between HHA eXchange and Salesforce for Community Home Care.

One-Click Profiles

Create new Patient Profiles, Caregiver Profiles, and Admissions with one click from Salesforce.

Automatic Sync

Updated information pulls automatically from HHA eXchange back into Salesforce. No manual steps.

Real-Time Data Flow

Stale records are eliminated. Every coordinator sees the same live data at the same moment.

On-Demand Reporting

Robust census and utilization reporting available on demand. No more waiting until tomorrow.

WHY IT MATTERS

Real-time clinical data drives real-time care decisions.

Accurate data. Better decisions.

When coordinators see accurate patient and caregiver data the moment they need it, they act with confidence.

Better decisions. Better care.

Faster, informed decisions translate directly into higher quality care for every patient served.

Better care. Better outcomes.

Better outcomes for the patients and caregivers at the heart of what Community Home Care does.

Salesforce
excellence for home
care.

Madison Ave Consulting partners with home care organizations to connect their clinical, operational, and growth systems. This integration is one example of what becomes possible.
