

JACO Aerospace x Madison Ave Consulting

Manufacturing meets the Salesforce platform

JACO Aerospace is a precision manufacturing supplier to the aerospace industry. They needed a Salesforce environment that reflected how a modern manufacturer actually operates, from order to delivery.

THE CHALLENGE

Aerospace manufacturing is specialized

Precision manufacturing demands more than off-the-shelf software. JACO's operations exposed four critical gaps.

Custom Workflows

Order management required workflows built for precision manufacturing, not generic sales pipelines.

Document Integrity

Document control and version integrity are safety-critical. Errors are not an option in aerospace.

Shared Visibility

Sales and production teams operated in silos. They needed a single source of truth.

Disconnected Tools

Existing tools did not connect the dots. Data lived in too many places to be useful.

THE SOLUTION

Salesforce as the operational backbone

Madison Ave Consulting delivered a custom Salesforce build tailored to JACO's needs. Every component was purpose-built for manufacturing.

Custom Order Management

A full Order Management System built natively on the Salesforce platform.

Custom Kanban

Production visibility through a tailored Kanban process for the shop floor.

OneDrive Integration

Document and specification management connected directly to Salesforce records.

Marketing Platform

A campaign platform enabling targeted sales outreach from within the CRM.

Admin on Demand

Ongoing engagement to evolve the platform as JACO's operations grow.

WHY SALESFORCE FOR MANUFACTURING

One platform. Every operation.

The Salesforce platform is not just for sales teams. With the right architecture, it becomes the operational backbone of a manufacturing company.

- **Quoting and Ordering**
- **Production Visibility**
- **Document Control**
- **Customer Relationships**

All connected. All in one place.

Salesforce excellence for manufacturing.

Madison Ave Consulting partners with manufacturers to build Salesforce environments that match how their business actually runs.
