

CASE STUDY

Help At Home x Madison Ave Consulting

Ten states, one caregiver experience platform

Help At Home is a national in-home personal care provider. Their Salesforce transformation had to scale across ten state markets while holding a consistent caregiver experience and meeting strict state EVV requirements.

1

Ohio

2

Mississippi

3

Missouri

4

Illinois

5

New York

6

Georgia

7

Indiana

8

Michigan

9

Delaware

10

Pennsylvania

THE CHALLENGE

Scale the caregiver experience without sacrificing compliance

Ten Markets, Ten Rulesets

Each state carries its own EVV requirements. Compliance cannot be an afterthought at this scale.

Mobile-First or Nothing

Caregivers needed a platform they would actually use. Adoption depends on experience, not mandates.

Fragmented Operations

Intake, matching, scheduling, and care coordination were scattered across disconnected tools.

Retention at Stake

Frontline staff retention hinges on how the platform treats them. Poor tooling drives turnover.

THE SOLUTION

Caregiver Experience on Salesforce Health Cloud

Madison Ave deployed a full Caregiver Experience platform across all ten markets. One unified system. Every workflow connected.

360-Degree Caregiver View

EVV, incident reporting, vaccinations, schedule management, utilization, hiring, and training in one place.

Embedded EVV Mobile Tracking

Managed API integrations to Sandata and HCHB. Compliance built into the daily workflow.

Centralized Intake and Scheduling

Matching and scheduling unified under one platform. No more tool-switching.

Automated RCM and Authorization

Revenue cycle and authorization workflows automated end to end.

Recruiting and HR On-Platform

Hiring and HR built on the same Salesforce instance. One system of record for the full caregiver lifecycle.

A team of specialists, one unified blueprint

We structured the engagement around four bespoke packages tailored to Help At Home's 2024 strategy. Each package scales hours and scope while keeping a consistent delivery framework.

1

Markets Lite

Entry-level scope for smaller market activations.

2

Markets

Full market deployment with core platform capabilities.

3

Markets and Teams

Expanded scope covering team-level workflows and coordination.

4

Markets Teams and Beyond

Maximum scope with parallel rollouts and full optimization.

Dedicated Team

Project Manager, Engagement Manager, Consultant, and Developer on every program.

Parallel Rollouts

Multiple markets activated simultaneously without sacrificing quality.

License Optimization

Continuous review to eliminate wasted spend as the program scales.

Data Migration

Managed migration from legacy platforms with zero disruption to care delivery.

WHY IT MATTERS

The ripple effect of a better caregiver experience

Better Platform

Caregivers get tools that respect their time and simplify their day.

Higher Job Satisfaction

Elevated experience drives engagement and reduces burnout.

Stronger Retention

Stable workforce means consistent, high-quality patient care.

Better Patient Outcomes

Continuity of care improves when caregivers stay and thrive.

Enhancing the caregiver experience is pivotal. That ripple effect is why we built the platform the way we did.

Madison Ave Consulting

Salesforce excellence for in-home care
