

CASE STUDY

Bluecrest Recovery x Madison Ave Consulting Health Cloud + ZenChart EMR

Bluecrest Recovery Center, part of Keystone Recovery, is a behavioral health provider focused on long-term recovery outcomes. Their clinical operations run on ZenChart. Their growth and coordination run on Salesforce. Both had to talk to each other.

THE CHALLENGE

Clinical Data Trapped Outside the CRM

Siloed Source of Truth

ZenChart held all clinical records. Salesforce had no visibility into patient status or care history.

Disconnected Operations

Salesforce managed intake, care coordination, and alumni engagement in isolation from clinical data.

Blind Spot at the Point of Care

Coordinators needed clinical context to make real-time decisions. They were flying blind.

Wrong Tool for the Job

Generic Salesforce did not capture the nuance of behavioral health workflows. Customization was critical.

THE SOLUTION

Health Cloud Implementation + ZenChart Integration

Madison Ave Consulting delivered a full Salesforce Health Cloud implementation tied directly to ZenChart.

Patient Records

Health Cloud patient records with full care team coordination built in.

Custom Workflows

Behavioral health intake and engagement workflows tailored to Bluecrest operations.

Bi-Directional Sync

Real-time ZenChart integration pushes and pulls clinical data automatically.

Leadership Dashboards

Reports and dashboards give leadership full visibility into outcomes and operations.

WHY IT MATTERS

Clinical Context Enables Clinical Decisions

When care coordinators have real-time clinical data at their fingertips, they make faster, better decisions.

For patients in active recovery, that is the difference between staying on track and falling through the cracks.

Faster Decisions

Real-time data eliminates delays in care coordination.

Better Outcomes

Clinical context keeps patients on track through every stage of recovery.
