

CASE STUDY

Enlightened Solutions x Madison Ave Consulting

Where clinical care meets growth

Enlightened Solutions is a behavioral health provider committed to peer recovery, alumni engagement, and long-term patient outcomes. Their clinical EMR and their growth platform needed to work as one.

THE CHALLENGE

Two systems. One patient.

Clinical Source of Truth

KIPU EMR held all patient records. It lived in its own world.

Growth Platform Disconnect

Salesforce powered outreach and operations. But it was flying blind.

Double-Entry Burden

Care coordinators re-entered patient data manually. Every day.

Delayed Decisions

Stale information meant care decisions waited. In behavioral health, that is a risk.

THE SOLUTION

Full-stack Salesforce + KIPU Integration

Madison Ave Consulting delivered a complete Salesforce environment tied directly to KIPU.

Bi-Directional KIPU Sync

Real-time patient data flowing both ways. No lag. No gaps.

Salesforce Lightning

Full Lightning implementation across all operations.

Marketing Cloud

Patient and alumni engagement at scale.

DocuSign Workflows

Intake and consent. Digital. Fast. Compliant.

CPRS Program Management

Certified Peer Recovery Specialist tracking built in.

Alumni Engagement

Long-term outcome tracking for patients beyond discharge.

CLIENT VOICE

What the client said

"Our care coordination team is getting information faster, leading to better decisions and better care."

Enlightened Solutions leadership

WHY IT MATTERS

In behavioral health, delay is risk.

The faster clinical data flows into the hands of care coordinators, the better the outcomes for people in active recovery. That is why we invested so heavily in integration design.

Madison Ave Consulting
Salesforce excellence for behavioral health

1

Unified Platform

KIPU and
Salesforce working
as one system

0

Manual Re-Entry

Double data entry
eliminated entirely
