

CASE STUDY

Edison Home Health Care Intake that moves at the speed of need

Edison is a national home health provider. Their patient intake team was drowning in paperwork and manual processes. Every delayed intake was a patient waiting for care.

THE CHALLENGE

Intake bottlenecks cost care hours

Manual processes created friction at every step. Case managers were stretched thin. Growth was impossible.

Form Generation

Manual creation of doctor, insurance, and state-required forms consumed hours every day.

Zero Visibility

Management had no real-time view into intake velocity or team performance.

Capped Capacity

Case managers were limited to roughly 25 cases each. A hard ceiling on growth.

Stalled Admissions

Monthly patient admissions were stuck at 150. The team had no room to scale.

Salesforce Service Cloud + Tableau CRM

→ Automated Form Generation

→ Real-Time Analytics

→ Tableau CRM

→ Streamlined Workflows

The laptop screen shows a medical dashboard for a patient named Julia Green. The dashboard includes sections for Patient Data, Vital Signs, Medication, and a list of upcoming appointments. A purple heart icon with a white pulse line is overlaid on the top right corner of the laptop screen.

THE RESULTS

Numbers that changed the business

3.7x

Patient Intake Growth

New patients entering the intake process in just 12 months.

80

Cases Per Manager

Triple the caseload each manager handled before automation.

2x

Monthly Admissions

From 150 to 300 patient admissions per month. Doubled.

Intake Directors finally had the data they needed to lead. Every metric moved in the right direction.

CLIENT TESTIMONIAL

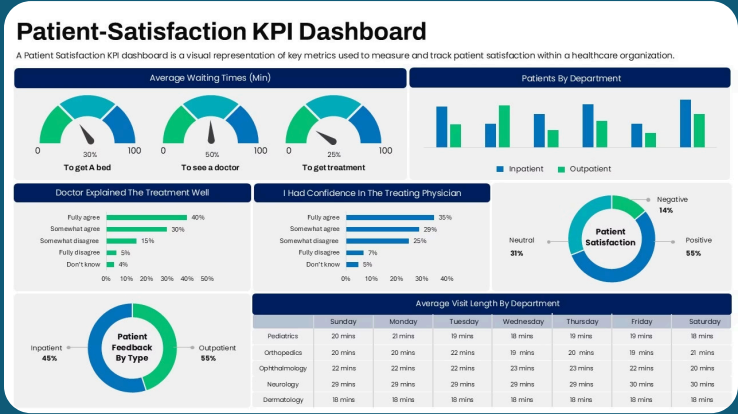

"I cannot imagine running my Intake team without Salesforce. The tools, automation, reports, and dashboards are amazing. There is no better tool."

Intake Director, Edison Home Health Care
